

**AMENDMENTS TO THE SUMMARY**

Please amend the paragraph [0005] of the Summary with the following Replacement Paragraph:

**[0005]** The present invention satisfies this need, and presents a ~~system, a computer program product, and an associated method (collectively referred to herein as "the system" or "the present system")~~ for providing a tracing mechanism to operate at a low level of detail during normal program execution and to automatically provide an increased level of detail during exception situations. This increased level of detail is provided in conjunction with history information prior to the exception situation.
